APACHE TRACK SYSTEM (SSV)

APACHE 360 LT TRACK SYSTEM

- *Highly engineered track system provides ultimate traction in harsh conditions for your Can-Am vehicle.*
- *Heavy-duty components ensure reliability and the design offers excellent acceleration, turning, braking and side-hilling performance.*
- *The DPS† module, included in the mounting kits, optimizes your Dynamic Power Steering (DPS) performance by maximizing steering agility at lower speeds while providing firmer steering at cruising speeds. It also provides a speed correction factor for the speedometer.*

Unique adjustable contact patch system to tackle the toughest year-round conditions.

Easy installation and quick conversion from tires to tracks.

Rubber over molded heavy-duty double bearing wheels and offset wheel spacing reduce friction and vibration while ensuring reliability.

YEAR-ROUND TRACKS

The Apache 360 LT Track System provides a unique adjustable contact patch that enables you to tackle the toughest conditions year round. Some users love them in very humid or swampy lands, to help maintain a better ground adhesion all season round.

APACHE LT TRACK SYSTEM

- Multifunctional tracks designed to support heavy loads and to fit on most Can-Am off-road vehicles.
- Extra contact patch adjustment for better performance over rough terrain.
- Contact patch is 7 to 9% bigger than the Apache 360's.
- Average ground clearance of 17.3" (44 cm).
- 1" (2.5 cm) lugs in the front and 1.25" (3.2 cm) in the back.
- Apache 360 LT Mounting Kit is required.

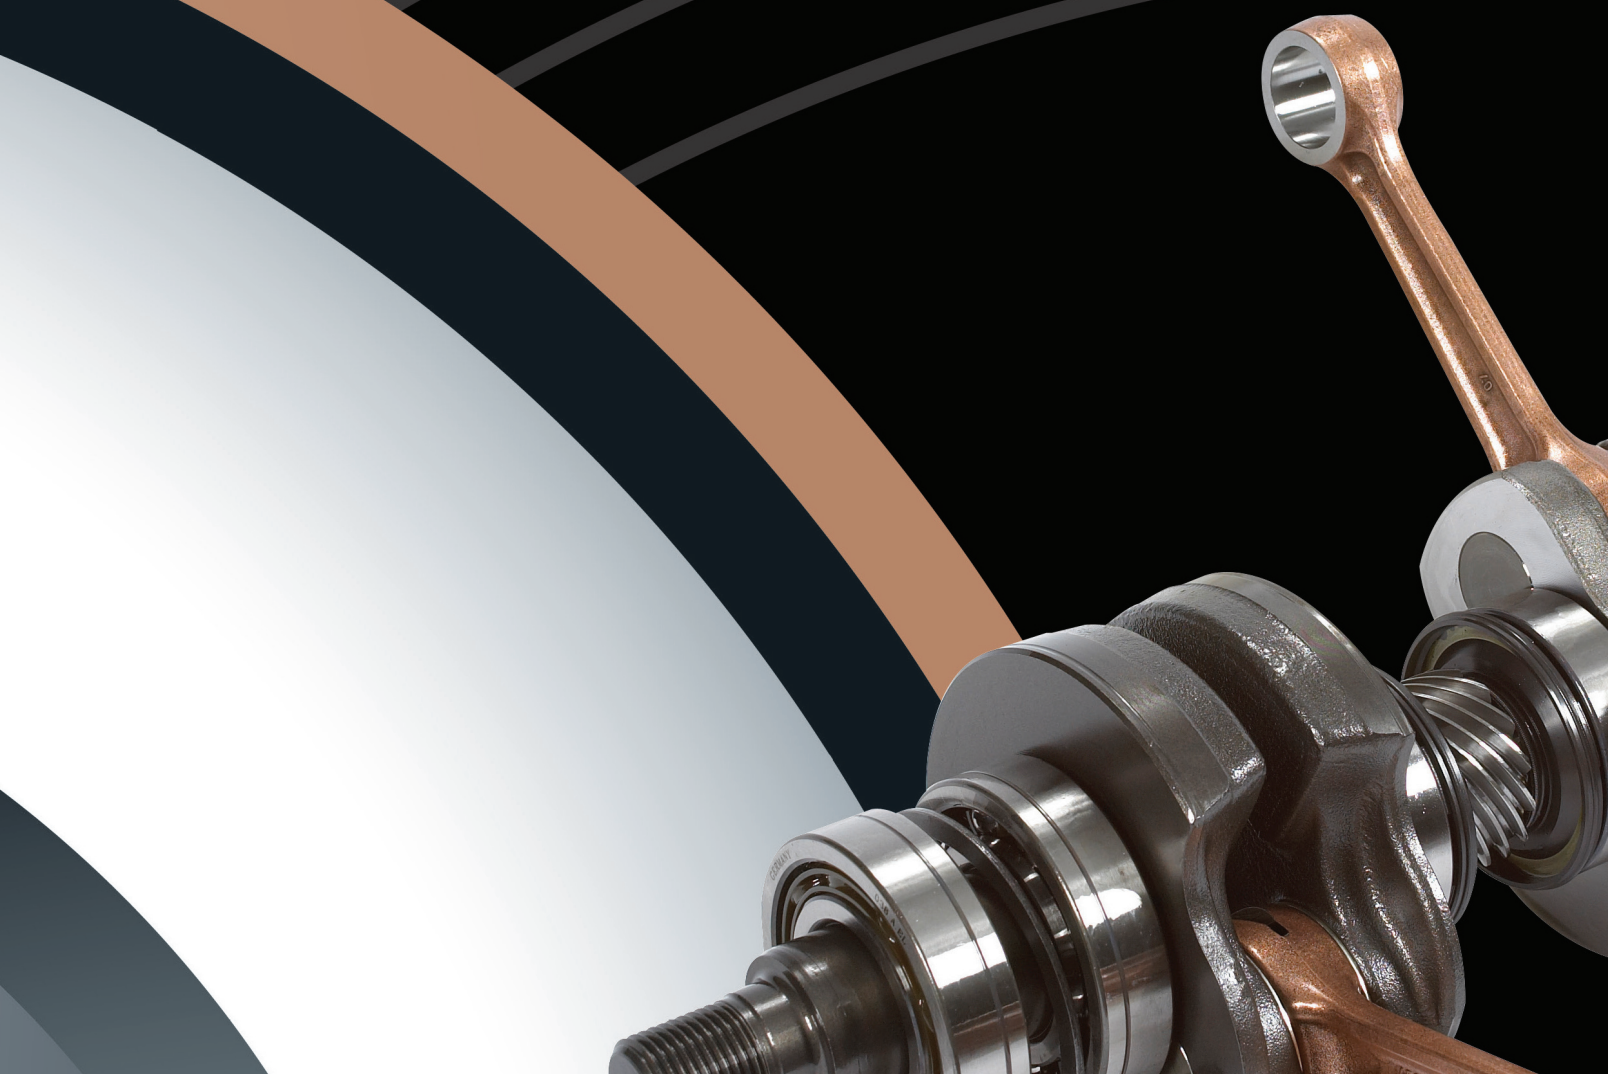
BRP REBUILD CENTER

Built on Tradition. Driven by Excellence.

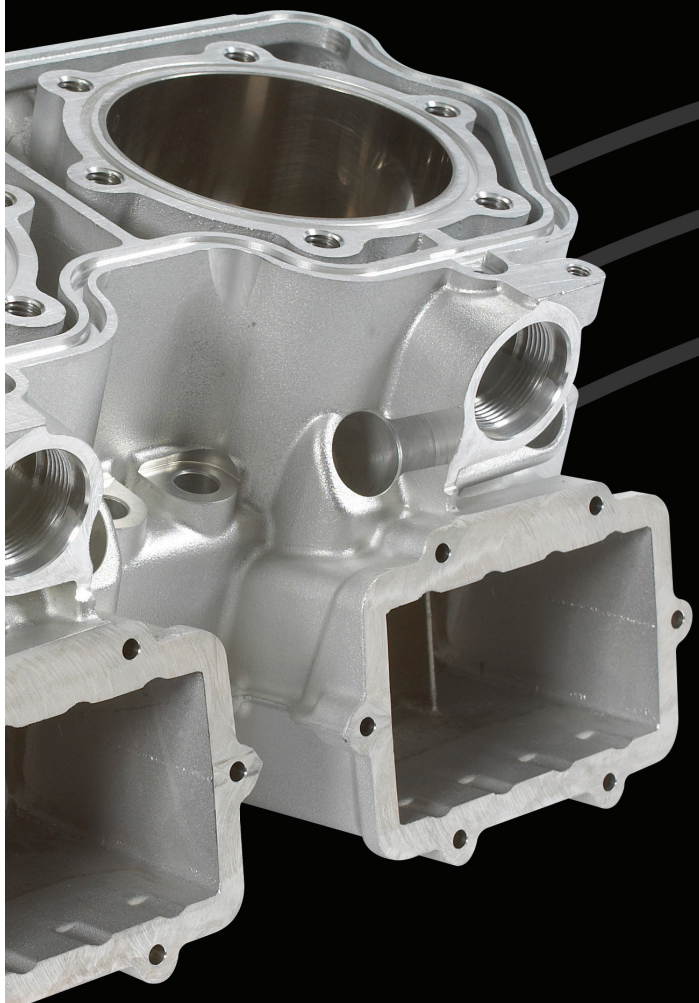
NUMBER ONE ON THE ENGINE BLOCK



REBUILT PARTS

WE KNOW PARTS LIKE NO ONE ELSE

BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.



WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty
