

# TERRAIN IS NO LONGER THE LIMIT

**APACHE**  
TRACK SYSTEMS

**can-am**

## WINTER TRACKS

# APACHE BACKCOUNTRY & BACKCOUNTRY LT

Finally explore winter with no traction limitations and no compromise, thanks to the unmatched performance of Apache Backcountry track kits. Engineered to thrive in the deepest snow—for work or play. Don't let winter stand in the way.

## SNOW

## YEAR ROUND TRACKS

# APACHE 360 & 360 LT

These ATV & SSV track kits improve your vehicle's ground clearance and increase its contact patch with the terrain. Adapt your track setup to the conditions you'll be riding and for what purpose, with the Apache 360 & 360 LT system as our all-season, all-terrain masterpiece.

## MIXED CONDITIONS

## ENGINEERED

Unmatched performance and durability with our purpose-built track systems: choose Apache Backcountry for leading snow performance or Apache 360 and 360 LT for all-season versatility.

## DESIGNED

Each track has a specific purpose and designed without compromise for work and play. Whether it's for deep snow riding, trail riding or for heavy loads, Apache tracks are akin to floating across the terrain.

## BUILT

Designed by Can-Am for your Can-Am: Apache Track Kits are matched to your engine output, chassis setup, speedometer, and work with DPS power steering for perfect control, anywhere.

# WINTER TRACKS

## GET THE MOST OUT OF YOUR CAN-AM VEHICLE THIS WINTER FOR ALL YOUR ENDEAVORS.

**EXPLORE WITHOUT COMPROMISE.** Ride on untouched trails, traveling deep into winter's embrace and you'll know: the same technology behind our world-renowned snowmobiles is at your command. With a larger contact patch, and more aggressive track design, travel beyond what you thought possible with the best snow performance.

COVERED BY A **1-YEAR WARRANTY**

### TRACK PATTERNS

2" lug and 3" pitch to increase floatation and traction in various snow conditions.

### GEOMETRY

Aluminum slider system reduces rolling resistance and increases the contact patch.

### ACCESSORIES

Customize your kit to your riding conditions with additional idler wheels, Vespel sliders and ice scratchers.

### DPS MODULE

Enhance your track experience with Can-Am's unique Dynamic Power Steering module. By configuring multiple settings such as powersteering response and speedometer with the track ratio, your vehicle's speedometer and odometer will stay true and in sync.

### EASY INSTALLATION

Can-Am's vehicle specific mounting brackets simplify initial track installation. The integrated design allows them to remain fitted while using wheels, making future installations as simple as changing a tire.

## APACHE BACKCOUNTRY TRACK SYSTEM

### FITS

- > All Can-Am ATVs
- > Maverick Trail
- > Maverick Sport

Designed to support ATVs and lightweight SSVs while delivering better control.

## APACHE BACKCOUNTRY LT TRACK SYSTEM

### FITS

- > Defender
- > Maverick X3

Designed to support the heavier loads of SSVs while delivering better traction and an unmatched floatation level.

# YEAR ROUND TRACK

## WORK & PLAY YEAR ROUND THROUGH MUD, SNOW, & ALL TYPES OF TERRAIN.

**RISE ABOVE TERRAIN**, weather, and whole seasons with the Apache 360 LT and 360 track kits — the upgrade that takes the Can-Am experience to another level. Designed for superior traction and carrying heavier loads in soft terrain, both 360 and 360LT track kits can be installed on ATV and SSV vehicles and used year round for exploring and completing tough tasks.

COVERED BY A **2-YEAR WARRANTY**

### TRACK PATTERN

The pattern is different for front and rear tracks in order to optimize steering and traction over all terrain and in any conditions.

### EASY INSTALLATION

Can-Am's vehicle specific mounting brackets simplify initial track installation. The integrated design allows them to remain fitted while using wheels, making future installations as simple as changing a tire.

### DPS MODULE

Enhance your track experience with Can-Am's unique Dynamic Power Steering module. By configuring multiple settings such as powersteering response and speedometer with the track ratio, your vehicle's speedometer and odometer will stay true and in sync.

### ADAPT THE TRACK TO YOUR NEEDS

Adjustable attack angle allows you to customize your track to your terrain.

## APACHE 360 TRACK SYSTEM

### **FITS**

> All Can-Am ATVs

Multifunctional tracks, designed to fit most Can-Am ATVs.

## APACHE 360 LT TRACK SYSTEM

### **FITS**

> All Can-Am ATVs and SSVs

Designed to support the heavier loads of high displacement ATVs and SSVs while delivering better traction and an unmatched flotation level.

## APACHE 360 LT 6X6 TRACK SYSTEM

The 360 LT 6x6 has all the load and pulling capacity of the Outlander 6x6 so you can always get the job done.

# APACHE BACKCOUNTRY & BACKCOUNTRY LT

## TECHNICALS ASPECTS

### TRACKS

The Backcountry track pattern is designed for optimal snow traction, without compromise. The 2” lugs combined with the 3” pitch allow your vehicle to “float” over deep powder and challenging terrain with class-leading traction.

### WHEELS & SLIDERS

The Backcountry and Backcountry LT use a combination of rubber over molded wheels and a snowmobile-like slider system. This combination reduces rolling resistance, maximizing power transfer to the ground.

### FRAME

The Backcountry system was designed for one purpose: to increase the contact patch. Composed of a steel upper section that supports lower aluminum sliders, the snowmobile-like geometry offers unmatched weight distribution on snow.

### ANTI-ROTATION ARM

Adjustable pre-loaded spring and multiple rubber dampers keep tracks securely in place and ensure your machine’s performance. Our unique system has been improved for better performance and control.

### SPROCKET

The Backcountry and Backcountry LT use an external drive sprocket for slip-free power transfer. Developed exclusively for Can-Am vehicles, it uses a 3” pitch for optimized performance in deep snow.

### TENSIONER

The Backcountry and Backcountry LT use an easy to operate snowmobile type tensioner.

# APACHE 360 & 360 LT

## TECHNICALS ASPECTS

### TRACKS

The position-specific track pattern allows optimal traction and flotation for any conditions. The angled track edge greatly reduces steering effort, making turns easier, even on challenging terrain.

### FRAME

The steel and aluminum frame combines the strength of a traditional steel chassis with a lightweight cast aluminum upper section to offer a lightweight-but-rugged track that can take on any element.

### WHEELS

The 360 and 360 LT use rubber over molded heavy-duty wheels, positioned in an offset pattern to reduce vibration. Each wheel uses two removable bearings to minimize friction, which both improves reliability and reduces maintenance.

### ANTI-ROTATION ARM

Adjustable pre-loaded spring and multiple rubber dampers keep tracks securely in place and ensure track performance over uneven terrain. Can-Am uses vehicle-specific tuning for optimal track articulation.

### SPROCKET

The 360 and 360LT use an internal drive sprocket, to ensure reliability in all conditions. Custom designed by Can-Am, for Can-Am, it is optimized for your vehicle’s gear ratio.

### TENSIONER & ADJUSTMENT

The attack angle on the 360 and 360 LT is adjustable: set a low attack angle to increase traction in soft terrain, or set a high attack angle to go over obstacles with greater ease.

BRP reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring obligation. Some models depicted may include optional equipment. BRP highly recommends that all ATV drivers take a training course. For safety and training information, see your dealer or call the ATV Safety Institute at 1-800-887-2887. ATVs can be hazardous to operate. Never carry passengers on any ATV not specifically designed by the manufacturer for such use. All adult model Can Am ATVs are Category G ATVs (General Use Models) intended for recreational and/or utility use by an operator age 16 or older. For side-by-side vehicles (SxS): Read the BRP side-by-side Operator's Guide and watch the Safety DVD before driving. Fasten lateral net and seat belt at all times. Operator must be at least 16 years old. Passenger must be at least 12 years old and able to hold handgrips and plant feet while seated against the backrest. ATVs and SxS are for off-road use only; never ride on paved surfaces or public roads. For safety reasons, the operator and passenger must wear a helmet, eye protection and other protective clothing. Always remember that riding and alcohol/drugs don't mix. Never engage in stunt driving. Avoid excessive speed and be particularly careful on difficult terrain. Always ride responsibly and safely. Printed in Canada.
