## HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

### HEAD

Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

### CHEST/BUST

Measure under your arms, around the fullest part of your chest.

### WAIST

Measure around your natural waistline, keeping one finger between the tape and body.

### HIPS

Across the fullest part of the seat.

### INSEAM

Without shoes, from crotch to the floor.

### ARM LENGTH

Let hands down the side in a slightly bent position. Measure from center back neck bone, along shoulder point and elbow, to bottom of wrist bone.

### GLOVES

Measure palm width.

## WHAT CODE REPRESENTS YOUR SIZE?

- Find your size.
- The corresponding code is THE CODE you use to complete the part number on your order.  
Example: 440 227\_\_90  
Size: M = Code 06  
Therefore 440 227 06 90

For tall sizes, look for the "T" next to the size. Example: "MT" stands for Medium Tall.

***XPS - THINK OF IT AS YOUR FIRST LINE OF DEFENSE AGAINST ENGINE AND VEHICLE COMPONENT WEAR.***

There's an XPS product that cleans, another that lubricates, or stabilizes, some that cool and yet others that extend life. Some do only one, others more, but whatever they do they do exceptionally well. And they all provide complete peace of mind where it matters most. Out there.

After all, you only get out what you put in... so if you're choosing anything other than XPS, then you're not putting into your vehicle what you expect to get out of it. The absolute best.
