## HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

**HEAD**  
Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

**CHEST/BUST**  
Measure under your arms, around the fullest part of your chest.

**WAIST**  
Measure around your natural waistline, keeping one finger between the tape and body.

**HIPS**  
Across the fullest part of the seat.

**ARM LENGTH**  
Let hands down the side in a slightly bent position. Measure from center back neck bone, along shoulder point and elbow, to bottom of wrist bone.

**GLOVES**  
Measure palm width.

## WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is THE CODE you use to complete the part number on your order.  
Example: 440227\_\_90  
Size: M = Code 06  
Therefore 440227 06 90

For tall sizes, look for the "T" next to the size. Example: "MT" stands for Medium Tall.

## CUSTOM ACCESSORIES

A bobber, originally called a 'bob-job' from the 1930s through 1990s, is a style of custom motorcycle. The typical construction includes stripping excess bodywork from a motorcycle, and shortening the rear fender, which is "bobbed" (as in bob-tail).

### BOBBER KIT\*

- Everything needed to transform a 2-up into a 1-up.
- Rear fender, tail light assembly, footrest trim, license plate support, and all necessary hardware included.
- Can also accommodate any production or accessory seat.

\* · A bobbed tail increases the amount of projection from the rear tire versus a traditional fender.

· Laws vary state to state regarding rear fender tire coverage compliance. Please obey all applicable laws and regulations.
