HOLD THE POWER. TAKE THE HIT.

Axles act as pressure points in the power system, absorbing stress to help protect more complex and costly components. No weak links. Just smart engineering.

1 THE FIXED JOINT

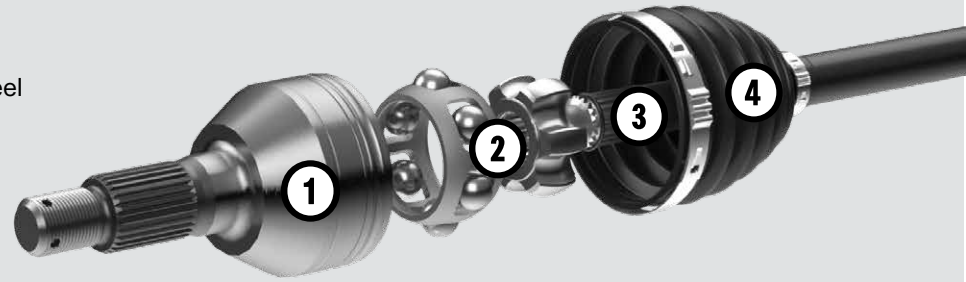

Forged from high-grade, heat-treated steel with polished internal surfaces, the Fixed Joint delivers exceptional strength, durability and long-lasting fatigue resistance.

2 THE CAGE, STAR & BEARING BALLS

Engineered to OEM-level tolerances with polished finishes and smooth radii, the Cage, Star & Bearing Balls minimize stress and friction to deliver superior strength and fatigue life and reduced NVH.

3 THE BAR SHAFT

Made from heat-treated alloy steel and precision-engineered to exact torsional strength specs, the bar shaft delivers the ideal balance of strength and stress absorption to protect critical drivetrain components.

4 THE CV BOOTS

Made from puncture, wear and temperature resistant TPE, a polymer offering far greater durability than a rubber counterpart, and sealed with high quality, low-profile Oetiker clamps. Premium extreme temperature grease reduces friction and protects joints subjected to high mechanical and thermal loads.

- Each key communicates wirelessly with the vehicle using a unique encrypted code. The engine is designed to start only when the key and vehicle code match.
- All RF D.E.S.S.™ keys are fully programmable and support multiple speed and torque profiles (based on vehicle options). This allows precise control tailored to the rider or the riding environment.
- Different programming levels help first-time users learn progressively while building confidence and control.
- Available color options make it easy to distinguish between programmed keys at a glance.
- Keeping a spare key helps prevent unnecessary costs or delays if the original is lost, and adds convenience when multiple people use the vehicle.

DESIGNED TO PERFORM. PROVEN TO WIN.

From dyno to desert, BRP drive belts are tested in brutal real-world and race conditions.

1
THE TOP COG
Engineered for durability and precision. Made from a specialized compound distinct from the lower cog to optimize power transfer and reduce distortion under extreme loads.

2
ADHESION LAYERS
Reliable, seamless integration. Advanced adhesion layers ensure strong bonding of **both cogs to the tensile cord**, delivering consistent performance and extended belt life.

3
THE TENSILE CORD
Unmatched strength and flexibility. High-performance aramid cords provide superior tensile strength and precise load distribution, tailored to your machine's power requirements.

4
THE LOWER COG
Optimized for power and control. A proprietary blend of premium rubbers delivers perfect flexibility for smooth clutch engagement and maximum torque transfer.

5
IMPREGNATED FABRIC
Built to last. Reinforced fabric layer enhances abrasion resistance, protecting both the belt and clutch components for longer service life.

DEFORMATION RESISTANCE UNDER STATIC COMPRESSION TEST

BRP XD roller

The **BRP XD roller** withstands 4 times the load in compression compared to most popular aftermarket thermoplastic-type rollers with a displacement/ deformation of 0.5 mm.

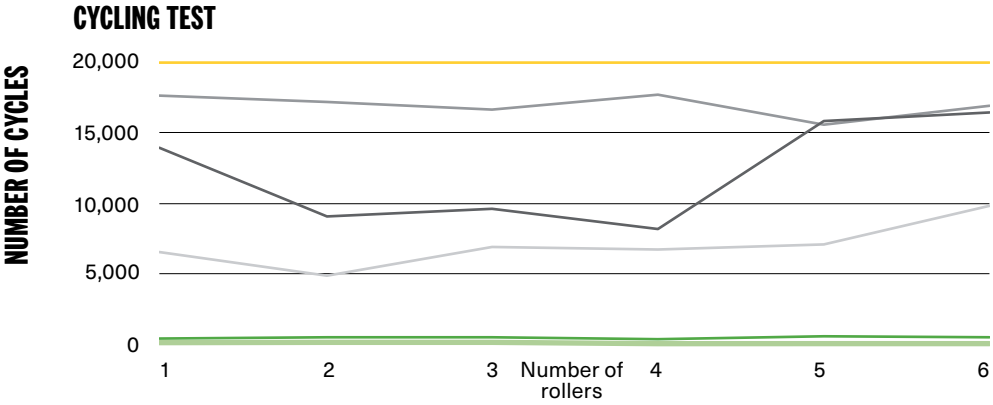

QRS XD rollers are built to take a beating. With more impact resistance and less deformation than standard designs, they hold up under pressure, protect belt performance and keep the pulley system running clean and smooth, ride after ride.

BUILT TOUGH TO KEEP POWER MOVING

Stronger than fiber rollers and more stable than thermoplastic designs, QRS XD rollers resist high-impact shocks and deformation that can seize pulleys or shred belts. A major upgrade for reliability, durability and consistent performance under stress.

CYCLING TEST

Thermoplastic Type Sample 3

Thermoplastic Type Sample 2

Thermoplastic Type Sample 1

Fiber Type Sample 2

Fiber Type Sample 1

The **BRP XD rollers** performed 40% more cycles* than the average for thermoplastic-type rollers and 99% more cycles* than the average for fiber-type rollers. Both thermoplastic and fiber roller tests ended in failure.

*Based on 20,000 cycles of our XD rollers, without any signs of failure.
