DEFENDER MAVERICK COMMANDER

APACHE 360 LT TRACK SYSTEM

- Highly engineered track system provides ultimate traction in snow and any other type of ground surface for your Can-Am vehicle.
- Front track design reduces vibration, eases turning and enhances performance in any hard packed conditions. The angled front lugs minimize resistance, and the way the lugs overlap over the wheels ensures smooth rolling. The rear track pattern and lug height are balanced for greater traction.
- Unique adjustable contact patch enables you to tackle the toughest conditions year round. This new system has two settings: the user can choose a better attack angle in rough terrain or greater flotation in deep snow.
- Thanks to the heightened rubber over molded heavy-duty double bearing wheels and offset wheel spacing, friction and vibration are reduced to a minimum while ensuring reliability.
- Easy installation and quick conversion from tires to tracks once the Apache 360 LT Mounting Kit is installed (sold separately).
- The DPS module, included in the Apache 360 LT Mounting Kit, optimizes your Dynamic Power Steering (DPS) performance, maximizing steering agility at lower speeds while providing firmer steering at cruising speeds. It also provides a speed correction factor for the speedometer.
- Heavy-duty components ensure reliability and the design offers excellent acceleration, turning, braking and side-hilling performance.
- Larger contact patch than the Apache 360 Track System by 15 in² (97 cm²) at front and 41 in² (265 cm²) at back.
- Higher ground clearance than the Apache 360 Track System by 3/4" front and 1.25" rear.
- Higher rear angle of attack.
- Apache 360 LT Mounting Kit is required.

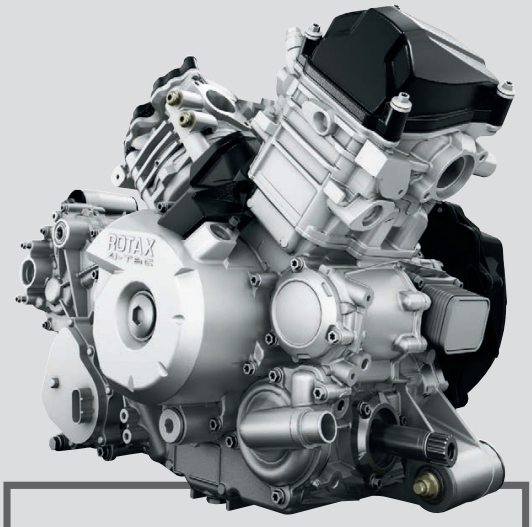
OILS & MAINTENANCE
EVERY PART COUNTS
PROTECT YOUR INVESTMENT BY ONLY USING GENUINE BRP PARTS
ROTAX
DEMAND XPS FOR YOUR BRP ROTAX® ENGINE

USING THE RIGHT OIL MATTERS

The right oil delivers:

THE BEST PERFORMANCE
THE BEST RELIABILITY
THE LONGEST LIFE

It's a balancing act to deliver all three attributes – and only XPS, with its custom blend formulations and carefully matched additives, is specifically designed to do just that in a Rotax engine.



"The best oil is the oil that was specifically designed for the engine, without compromising the engine."

Mischa Zimmermann
Project Leader Engine Development, BRP

DOES ONE OIL FIT ALL?

Our efficient, high-output engines place strong demands on engine oil. At BRP, we treat oil like an actual mechanical part that is developed concurrent with our latest high-performance engine technology.

XPS 4-STROKE OILS

Fact: XPS 4-stroke oils are BRP engineer-certified for unmatched lubrication, the right characteristics for our wet clutches, the right viscosities to best protect our engines from startup to operating temperatures, and they all have extra corrosion protection to better protect your engine.

WHY CHOOSE XPS 4-STROKE ENGINE OILS INSTEAD OF LOWER-COST ALTERNATIVES?

BRP engineers and experts like Mischa Zimmerman have proven repeatedly that other brands of oil don't meet the high standards BRP desires for engines like the Rotax 4-Tec 1000 Turbo.

- Each vehicle manufacturer establishes their own lubrication standards and test criteria to validate OEM oil – this means XPS achieves a much higher standard.
- Even oil that is more expensive than XPS will not have the same custom-matched performance for Rotax engines.
- Our oil is tested on the whole lineup of vehicles and engines we manufacture – not just one or two models. Our specific testing includes real world test miles to ensure XPS meets our performance requirements as opposed to relying only on generalized, minimum specifications that most aftermarket oil brands use.

AREN'T THERE OTHER HIGH QUALITY OILS ON THE MARKET?

Yes. But no other oil is designed as an actual mechanical part during engine development like XPS. Your satisfaction matters.

XPS®

WHY USE XPS OIL IN YOUR CAN-AM OFF-ROAD?

Oil Matters. The right oil will give your engine the best performance, reliability and long life. It's a balancing act to deliver all three attributes – and only XPS is specifically designed to do just that in Rotax engines.

OIL MATTERS: XPS 4-STROKE OIL

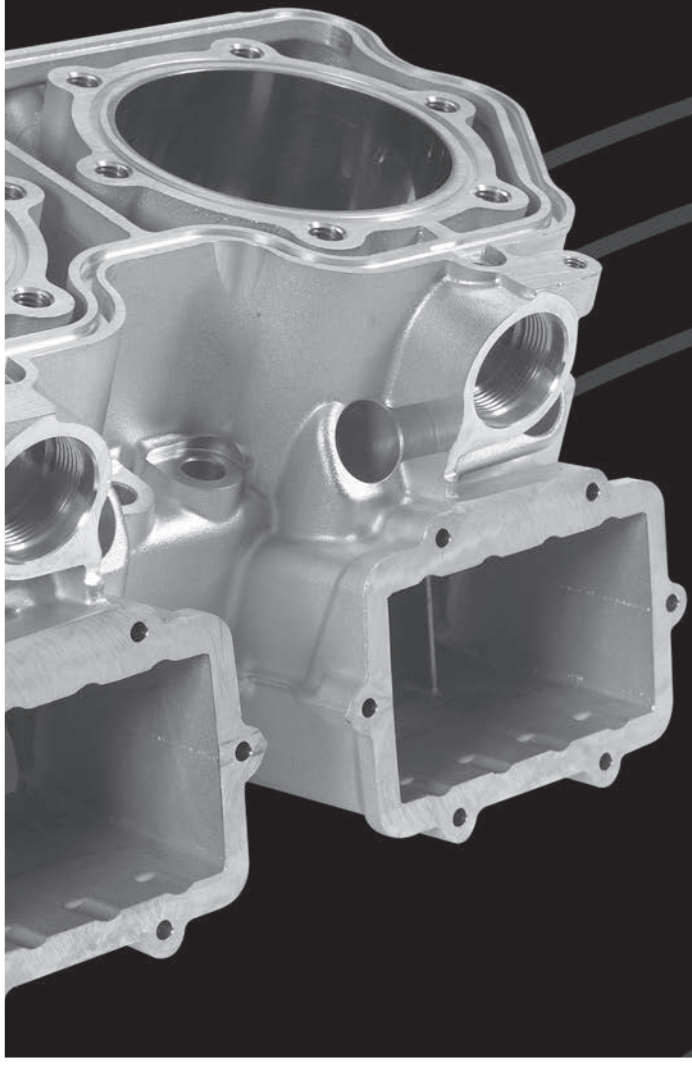
BRP REBUILD CENTER
Built on Tradition. Driven by Excellence.
NUMBER ONE ON THE ENGINE BLOCK

REBUILT PARTS

WE KNOW PARTS LIKE NO ONE ELSE

BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.



WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty
