No traction? No problem. Apache XC Tracks are built for serious terrain. With improved flotation and stability, they tackle deep snow, mud, and everything in between. Engineered for optimized attack angles, reduced noise, and unmatched durability, this system means all-season dominance.

DESIGNED FOR PEAK PERFORMANCE

Aggressive lugs deliver max traction without sacrificing handling. A reinforced steel frame boosts strength, while the center slide improves alignment and reduces de-tracking. Reduced NVH levels and the wheel placement ensure smooth, quiet power delivery. Plus, wheel longevity is increased with replaceable wheel bearings.

CHOOSE THE RIGHT MOUNTING STYLE

Windshields do more than block wind—they cut fatigue, improve comfort, and keep debris out of the zone. Outlander G3 and G3L models offer two smart mounting styles built to match different ride preferences and functional needs.

HANDLEBAR-MOUNTED

Quick to install, these windshields move with the handlebars for dynamic coverage that tracks with every turn. A flexible, straightforward option for wind protection on the go.

CONSOLE-MOUNTED

They stay fixed to the frame for stable, consistent protection from wind and debris, no matter how you steer. Plus, since they're not mounted on the handlebars, they won't affect handling or control.

Can-Am air filters are built for harsh conditions, delivering superior filtration without choking performance. Made to meet exact specs and protect engines from dust, mud, and debris, they're the first line of defense when the ride gets rough.

BUILT STRONG. FILTERS SMARTER.

Each filter features high-density pleated media for maximum dirt-holding capacity, a molded seal for tight fit, and durable construction to prevent collapse in extreme conditions. Engineered to work in sync with Can-Am engines—no guesswork, no compromise.

AIR FILTERS

Premium Air Filter

- Premium quality filter.

CAN-AM AXLES ARE ENGINEERED TO EXACT TOLERANCES, TESTED TO ENDURE EXTREME LOADS, AND BUILT WITH HIGH-GRADE MATERIALS TO HANDLE HEAT, FLEX, AND ABUSE WITHOUT COMPROMISE.

Genuine Can-Am axles perfectly match drive train, steering, and suspension geometries to reduce steering effort, premature wear, and unwanted loads on components such as ball joints, tie-rods, and bearings.

Can-Am axles do more than just transmit power. They protect your ride with carefully engineered thresholds, absorbing stress to protect the rest of your drive train.

Every Can-Am axle is precision-machined, heat-treated chromium and molybdenum alloy steel, combined with TPE CV boots and friction- and heat-reducing grease, resulting in longer joint life.

HOLD THE POWER. TAKE THE HIT.

Axles act as pressure points in the power system, absorbing stress to help protect more complex and costly components. No weak links. Just smart engineering.

- Robust design for off-road usage and sealed for prolonged durability.

Strength, stability, and control. Can-Am A-arms and ball joints are built to keep the suspension locked in and tires planted. Engineered for max articulation, impact resistance, and durability in brutal terrain, they help keep machines running and riders moving.

MADE TO FLEX. BUILT TO HOLD.

High-strength ball joints absorb punishing hits and deliver full-angle movement without binding. Superior sealing and lubrication keep dirt out and performance in. Designed to maintain contact with the ground, because traction means control, and control means confidence.

These are the same high-performance pads installed at the factory, now available in complete kits for quick, full replacements. Engineered with Can-Am, in collaboration with Brembo, to deliver consistent stopping power, even in the toughest off-road conditions.

BUILT FOR BRUTAL STOPS

These pads are optimized for off-road abuse, built to handle heat, grit, and repeat impact. Every kit includes the right components for a full pad swap, with stopping power that never backs down.

BRAKES

Metallic Brake Pad Kit

- Sintered compound delivers an optimal balance between durability, braking power, and noise.
- Each of our friction compounds is the result of joint research and development with industry leader Brembo.
- 1 SKU now includes left and right pads and all necessary hardware.

1

THE TOP COG

adds strength and limits deformation. It's made from a different compound than the lower cog to suit distinct power transfer roles.

2

ADHESION LAYERS

promote bonding between the cogged undercord compound and the aramid cord.

3

THE TENSILE CORD

is made with lightweight, high-strength aramid cords, each layer matched to your vehicle's specific power and performance demands.

4

THE UNDERCORD

is a custom mix of natural/synthetic rubbers and high-performance materials, designed for ideal flex and clutch engagement.

5

IMPREGNATED FABRIC

Powersport engines are some of the most powerful for their size. This reality creates a lot of pressure and stress on all components, including oils and lubricants. Finding the right balance between lubrication and durability is hard, but that's exactly what you'll find in every XPS bottle. Our chemistry evolved over thousands of testing hours to deliver power and durability like only XPS can.

XPS

OIL THAT GOES THE DISTANCE

XPS OILS

Developed as an integral part of the engine and vehicle, XPS lubricants don't settle for a certification. Always looking for more power and torque is in our DNA. This quest for performance created our need for specifically engineered lubricants.

SIZING CHART

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

1 HEAD	Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.
2 ARM LENGTH	Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.
3 CHEST/BUST	Measure under your arms, around the fullest part of your chest.
4 WAIST	Measure around your natural waistline, keeping one finger between the tape and body.
5 HIPS	Across the widest part of the seat.
