HID Xenon Lighting System

Our HID Xenon high and low beam lighting system provides revolutionary lighting for 3 times more light on the road compared to traditional halogen headlights. Each light uses a tube of Xenon gas, and small amounts of other noble gases, placed between two high-voltage electrodes that emit a bright bluish/white light when electrodes are activated. XPS - THINK OF IT AS YOUR FIRST LINE OF DEFENSE AGAINST ENGINE AND VEHICLE COMPONENT WEAR.

There's an XPS product that cleans, another that lubricates, or stabilizes, some that cool and yet others that extend life. Some do only one, others more, but whatever they do they do exceptionally well. And they all provide complete peace of mind where it matters most. Out there.

After all, you only get out what you put in… so if you're choosing anything other than XPS, then you're not putting into your vehicle what you expect to get out of it. The absolute best.

XPS. MORE THAN JUST OIL.

WE KNOW PARTS LIKE NO ONE ELSE

BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.

WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty
