Feature highlights

1 Liquid-cooled system

Industry-leading cooling system: battery, inverter, on-board charger and motor are liquid-cooled. Liquid cooling offers a more efficient cooling process, optimizing charging speed and performance in almost any conditions compared to an air-cooled system.

2 10.25 in. touchscreen display with BRP Connect and Apple Carplay

A high-resolution infotainment system that puts an interactive, informative and customizable experience that's both seamless and simple right at your fingertips.

3 Chaincase

The chaincase protects the high-quality silent chain from the elements and keeps it lubricated with oil. An automatic tensioner ensures perfect chain tension without the need for regular maintenance.

4 Passive and active regen

Passive regen and active regen both return energy to the battery and contribute to the motorcycle's deceleration. Active regeneration, which is used by turning the accelerator forward, gives back even more energy to the battery and offers greater deceleration. Both types of regen can be adjusted.

5 Lightweight architecture

The battery is an integral part of the chassis, reducing the number of parts and the overall weight of the motorcycle, making it very agile and easy to handle.

6 Off-road performance

Front and rear KYB suspension with 10 in. (255 mm) of suspension travel to overcome difficult trails in comfort and confidence. 21" front and 18" rear knobby tires providing good grip on different types of terrain.
